

Loggningar gjorda hemma i stadsdelen Klockaretorpet i SV Norrköping, på en 440 meter lång antenn i ca 295 grader (= ostligaste NA) och en Perseus mottagare under perioden 8 nov-09 – jan-10. Inget hört på x-bandet 1600-1700, troligen beroende på att jag har lång koax (220m) som dämpar de redan svaga signalerna; stationerna där har bara 1000 watt. Detsamma gäller för "local channels", 1230, 1240, 1340, 1400, 1450, 1490. Fortfarande återstår en hel del inspelningar att lyssna igenom, men det kanske inte ger så mycket nytt. **Röd = rar station.** I Väsby med västligare antenner, kan säkert andra stationer höras. /Sigge
