

Loggningar gjorda hemma i stadsdelen Klockaretorpet i SV Norrköping, på en 440 meter lång antenn i ca 295 grader (= ostligaste NA) och en Perseus mottagare under perioden 8 – 27 nov 2009. Konditionerna var mediokra – halvbra, sista veckan dock rätt dåliga. (Tidigare var kondsen mycket bra, speciellt den 7 nov, men det missade jag, p.g.a. trasig antenn). Kommer förmodligen uppdatering senare eftersom inspelningarna från 6 nätter ännu ej avlyssnats. /Sigge
