

Väsby 2-3 jan 2019

För min del har det bara blivit en natts lyssning i Väsby under den här säsongen, 2-3 januari. Stationerna kom igång riktigt tidigt, en del redan före kl 19 UTC, så det var ett lyckat val av natt. Visserligen inga konditioner mot västra halvan av USA, men desto bättre mot den östra med flera "finingar", bl.a. "daytimern" WFIF-1500 som vi höjde i Väsby dec 1997. Annars stationer som jag inte hört tidigare, inte ens i Parka.

Mottagare: Perseus. Antenn: 480m i 300 grader. Sign: "A/V" står för Sigge i Väsby. Tider: UTC.
